

HAVEN HENS

Age Chart

Started Pullets, Bantams and Female Ducks

Most chickens start to lay around 4 ½ to 6 months of age, meaning chicks hatched in May won't lay until late-summer.

By purchasing started laying hens (pullets) you avoid unintended roosters, shipping delays and chick-rearing problems, all while supporting a youth program in the process.

With limited availability for some breeds, many orders were split and divided across multiple weeks. All chickens were hatched between December 4th, 2024 and February 4th, 2025.
